### 1. Security strip

Vertical purple security strip with three windows. The windows feature images that move and alternate motif between KR and a royal crown when you tilt the banknote. The placement of the security strip may vary by up to 2 cm.

Close image overlay

### 2. Colour-shifting image

Colour-shifting image linked to the person portrayed on the banknote, in this case an olive branch. The banknote's denomination, 1,000, is also shown in the image. The image and the denomination gradually change colour between gold and green when you tilt the banknote.

Close image overlay

### 3. Intaglio print

Intaglio print, which makes the paper feel like a banknote and gives it a noticeable raised surface. Run your thumb over it or scrape lightly with a fingernail. Intaglio printing has been used for the portrait, denominations and the text SVERIGESRIKSBANK.

Close image overlay

### 4. Watermark

Watermark with the banknote's denomination and portrait that are visible when you hold the banknote to the light. The denomination appears significantly lighter than the rest of the paper.

Close image overlay

## 5. Security thread

Security thread embedded in the banknote paper. Visible as a dark line when you hold the banknote up to the light.

Close image overlay

## 6. See-through picture

A pattern that, together with a matching pattern on the reverse, forms the denomination when you hold the banknote to the light.

Close image overlay

## 7. UV image

UV image (three crowns) that fluoresces (glows) yellow and blue under ultraviolet light.

Close image overlay

## 8. UV fibres

UV fibres spread across the entire banknote that fluoresce (glow) yellow and blue under ultraviolet light.
